

To all that this may concern:

I listen to Air 1 radio station everyday and would be truly lost without hearing the words of encouragement and Christian songs to get me through some days. If you take the steps you are contemplating it will be a very good possibility that many good Christian stations will be lost. Free speech is one of the very few gifts we Americans have left and you are trying to take this away. To many times over the last few years people have done horrendous things to take God away from the American people, don't be another group who will do this.

Thank you,

Sincerely

Christine E. Bauer
